

# THE BAYSHORE SCHOOL

155 Oriente St, Daly City, CA 94014 • (415) 467-5443

[www.TheBayshoreSchool.org](http://www.TheBayshoreSchool.org)

The Bayshore Elementary School District is located in Daly City on the northeastern border of San Mateo County. It is a one school district, grades PK-8, consisting of a diverse student population of 378 students where 70% qualify for free and reduced lunch.

## FUNDING NEEDS

### Makers/STEAM Lab: \$250,000

In a window-filled, sunlit room, Bayshore's Makers/STEAM Labs are a great environment for our students to explore, engage, and create new new ideas experiment. However, what they lack are the very equipment to make that happen. Funding would be used to purchase new equipment (including robotics and makers kits) to build out the Labs and make them usable spaces for students to innovate and experiment.

### Mental Health/Wellness: \$100,00 - \$500,000

Mental health and wellness are a growing concern all across America. We would like to provide services for our students and the

greater community of Bayshore, which consists of an ethnically and economically diverse population. Funding will provide the necessary staff and programs to ensure the Bayshore community has the services it so desperately needs.

### Quality Theater: \$50,000

We have a beautiful new stage and theater, yet there are still items needed to allow staff and students to create quality performances.

Funding would provide better sound and lighting, theater drapes and side curtains, plus additional equipment to allow for enhanced productions and opportunities for self-expression.

### Literacy: \$80,000

Our current library collection is comprised of 25% fiction and 75% non-fiction, with the majority of the materials printed in the 1990's or earlier. Funding is needed to help build a new library

collection to provide our students with literature and works of non-fiction that reflect 21st century learning. Additional support is needed to create a Reading Program that increases our students' reading proficiency across all grade levels.

To contribute to these important and greatly-needed programs, please give online at:
